

ADI HAS POTENTIAL *maybe...*

she would go to the young woman whose epilepsy makes her afraid to leave her house.

that pup's magnificent nose and big heart would form a combination capable of alerting the young woman when a seizure was coming.

she would ease the fear and open the door to a whole world of opportunity where epilepsy would no longer take the lead.

ETNIE HAS POTENTIAL *maybe...*

she would go to the little boy whose classmates make fun of his disability.

she'd stand tall next to his wheelchair looking at her boy through eyes of love and show the world the immense power of kindness.

in the reflection of her eyes, the boy would come to realize that he is already amazing, regardless of how he gets from place to place.
